

# GLOBALink<sup>SM</sup> Cabin Applications

## Passenger connectivity options

More and more travelers today expect to be connected wherever they go and when they fly they expect the same capabilities they have on the ground. That's why ARINC's GLOBALink communication services include a complete suite of Cabin Applications for passengers. Now they can get up-to-date news, send and receive email and SMS messages, and connect to the Internet on their laptops. Airlines can easily track usage and analyze trends to create new advertising and revenue opportunities.

GLOBALink's Cabin Applications enable airlines to keep their passengers as connected in the sky as they are on the ground. Be it chatting online via instant messenger, checking their team's latest scores, or getting the most up to date weather report for their destination, airlines can rest assured that they are offering their passengers the best in-flight experience possible.

Cabin Applications include:

- ▶ Onboard Internet (Oi)—flexibly priced in-flight connectivity options
- ▶ Live Text News (LTN)—in-flight headlines, weather, business, and sports updates
- ▶ Seatback Messaging—convenient touch-screen email and SMS
- ▶ In-flight Services Portal—easy web access to all in-flight service accounts, passenger usage reports, and trend analysis

ARINC, a portfolio company of The Carlyle Group, provides communications, engineering and integration solutions for commercial, defense and government customers worldwide. Headquartered in Annapolis, Maryland with regional offices in London and Singapore, ARINC is ISO 9001:2008 certified.
