

## **ARINC RVSM Solution for Cessna 650 Aircraft**

ARINC Direct has teamed with AeroMech, Inc. and Thommen to offer an RVSM solution for the Cessna 650 aircraft. The solution includes an Installation Supplemental Type Certificate (STC), an RVSM Group Certification STC, and a Thommen Air Data Display Unit (ADDU).

### **Technically Proven and Cost Effective**

The Thommen ADDU received a TSO from the FAA in January 2004 making it a technically proven RVSM solution for the Cessna 650. Priced below the factory solution, the ARINC RVSM solution is a cost effective alternative.

### **Installations**

Installations of this solution are available at ARINC's facility in Scottsdale, AZ and our certified repair station in Colorado Springs, CO.

### **Convenient Kits Available**

Or if you prefer, an RVSM solution kit may be purchased for your certified repair station to install. Included in the kit are:

- Installation Supplemental Type Certificate (STC)
- RVSM Group Certification STC
- Upgraded dual AZ-800/810's -or- Upgraded AZ-800/810 and a Thommen Air Data Display Unit (depending on aircraft configuration)
- PMA Installation Kit
- Installation Documentation
- Technical Support for Installation

### **Place Your Order Now**

Orders for installations and kits are being taken now. Lead time for avionics is 2-3 weeks and the estimated down time for the installation is 3-7 working days, depending on aircraft configuration.

To place an order or for more information, please contact us by phone or email:
