

ARINC RVSM Solution for Hawker 700 Aircraft

ARINC DirectSM has teamed with AeroMech, Inc. to offer an RVSM solution for the Hawker 700 aircraft. The solution includes an Installation Supplemental Type Certificate (STC) for Collins-590 equipped aircraft, Field Approval for Honeywell ADC-80 equipped aircraft, an RVSM Group Certification STC, and a mini-trailing cone qualification flight to determine Static Source Error Curve.

Installations

Installations are available at ARINC's facility in Scottsdale, AZ or at our certified repair station in Colorado Springs, CO.

Convenient Kits Available

ARINC is also providing the RVSM solution in kit form to FAA certified repair stations. The RVSM kit includes the following:

- Installation Supplemental Type Certificate (STC) for Collins-590 equipped aircraft
- Field Approval for Collins ADC-80 equipped aircraft
- RVSM Group Certification STC
- Mini-trailing cone qualification flight to determine Static Source Error Curve
- PMA Installation Kit
- Installation Documentation
- Technical Support for Installation

Place Your Order Now

Orders for installations and kits are being taken now. Lead time for avionics varies between 3-18 weeks by aircraft configuration and estimated down time for installation varies by aircraft configuration.

To place an order or for more information, please contact us by phone or email:
