DCA 129.45	JFK 129.45	SAT 131.65	
DEN 130.20	KTN 129.40	SEA 129.85	
DFW 131.65	LAX 130.80	SFO 130.80	

For HF Radio and Equipment Checks at all locations, call ARINC On-Ground or enroute on a VHF network frequency to coordinate with RO.

**NETWORK PROCEDURES**

1. Call "ARINC" on area frequency shown relative to aircraft position. San Francisco ARINC (SFO) controls all networks except 130.70–Gulf of Mexico, and 129.90–NE US and Maritime Canada which are controlled by New York ARINC (NYC). Only the NYC networks are guarded by a dedicated radio operator (RO). All SFO networks are routed to ROs through a call distribution system which allows control of all networks with only 3 ROs and provides a visual indication of calls waiting for RO service. During busy periods, initial calls may not be answered immediately. If you do not hear a response within 1 minute, call again on the same frequency. **DO NOT CHANGE FREQUENCIES, this may cause further delays.** Stay on frequency at least 3 minutes for the RO to answer.  
 NOTE: Depicted coverage is for aircraft operating at and above FL200. Coverage below FL200 cannot be assured on all routes. Gaps in coverage may exist when operating below this altitude.
2. If not answered within 3 minutes, tune and call on adjacent area frequency using above procedures. In many locations overlapping coverage exists.
3. Direct questions to ARINC Service Desk (800) 633-6882 or (703) 637-6360.
